

Astronomical observation and tasting of Pyrenean liqueurs

Outreach activities of astronomy bring us closer to the knowledge and understanding of the firmament. Here you will learn how to identify constellations with the naked eye as well as how to examine from a telescope some deep-sky objects while you enjoy a good ratafia or cassis. Welcome to an experience in which culture, science and tradition merge.

Additional information:

We own two transportable telescopes and any additional material that might be needed in order to run the activity anywhere in the area. Observation sites oscillate depending on the season of the year:

Port de la Bonaigua
Esterrí d'Àneu
Espot
